
HAPPY TRASH CAN COMPOST
2024

COMPOSTABLES CERTIFICATE GUIDE

	<p>Biodegradable Products Institute (BPI), BPI Certified Compostable. USA's leader in lab testing and certifying the compostability of food serviceware. Recommended Brands: World Centric, Vegware, Biobag</p>
	<p>Compost Manufacturing Alliance: USA's leader in in-field testing & certifier. Recommended Brands: NoTree, Earth Choice, EcoProducts (compostable line)</p>
	<p>TUV Ok Compost. European Standard certification for compostability, ensuring that products meet rigorous criteria for breaking down in industrial composting facilities. Recommended Brands: Greenware</p>

CERTIFICATION IMPORTANCE

We need these certifications for our compost to ensure that our final compost product is healthy and reliable. Certification guarantees that the items contain no PFAS and will break down properly in our facility. Without these certifications, there's a risk of plastic contamination and receiving items that are mislabeled, which can harm our waste stream and the quality of our compost. Ultimately, this affects the health of our local soils, so having certified products is crucial for maintaining a sustainable composting process.
